

PHYSICAL DISTANCING

Physical distancing is a good way to avoid spreading the virus.

Keep 2 metres or 6 feet **between you and others**, the width of a couch, a kayak, or a tall person.

Modify some habits to ensure you keep a **physical distance between you and others**, such as no longer holding hands, or **avoid gathering** with other people.

Even in the cafeteria and in the corridors, **keep 2 metres (or 6 feet) between you and others.**

**ARE YOU
2 METRES
OR 6 FEET
FROM YOUR
NEIGHBOR?**

**BACK OFF,
YOU'RE
TOO
CLOSE!**

**REMEMBER,
A TALL PERSON
SHOULD BE ABLE
TO LIE DOWN
BETWEEN YOU
AND THE OTHERS.**
